Mines and Mining Stocks

HARRIS IS AFTER

Tries Luck in Bannock District.

Ray D. Harris, former Salt Lake newspaper man, who brought in the famous Florence lease in Seven Troughs district, has taken a lease on a block of the Iron Canyon Gold Mining company's ground in Bannock district.

The Harris lease is only a short distance south of the Iron Canyon company's main workings, from which in doing development work it has taken several carloads of ore which has been marketed at a Salt Lake smelter, bringing close to \$70 a ton. The leased block is on the same vein as the company workings, and several openings on the Harris ground show ore of commercial grade. Harris confidently expects to be taking out ore in shipping quantities within a very short time, for the pay stuff is continuous almost from the surface down wherever the vein has been opened.

The Iron Canyon property is about three

wein has been opened.

The Iron Canyon property is about three miles from the celebrated high-grade strike of the Nevada Omaha Mining company, which is in Philadelphia canyon, a tributary of Iron canyon. Aside from the big strike in Philadelphia canyon, the better showings of gold ore have been opened in Iron canyon. The ore occurs in strong veins in a porphyritic formation. It is usually a soft carbonate, found underneath from ten to twenty feet of iron capping, and the values are comparatively regular, running generally from \$40 to \$100 a ton. Indications are that ideal highgrade milling propositions are to be developed there.

Big Strike Holds.

Big Strike Holds.

The big strike at Bannock is holding out as strong as ever at the depth of 30 feet in the shaft, according to Jesse Fox, manager of the Iron Canyon Gold Mining company, who was in camp a few days ago. Slow progress has been made in sinking for the reason that the first 20 feet or more of the work was done by the manager "single-handed." The rich streak is so extremely rich that he could trust no one else to work in the hole.

Two miners are now employed, however. A strong house has been built over the shaft, the men are locked in when they are working and a guard is on duty to prevent outsiders from breaking in to carry off the precious rock.

Promising showings have been opened by several of the lessees who are working ground of the Nevada Omaha company, but none has yet encountered the phenomenally rich streak. The company is preparing for more extensive operations.

Grand Central to Resume Payments Soon-Iron Blossom in Doubt.

Policy of the Iron Blossom management Policy of the Iron Blossom management to pay an 8-cent dividend or nothing has barred speculating in that company's profit distribution. There is said to be no question that the company has in its treasury ample money to pay a dividend this month, but there is a question whether the directors will not deem it wise to conserve the treasury surplus for development requirements. Action of the stock yesterday indicated the state of uncertainty which exists in the mind of the talent.

of uncertainty which exists in the mind of the talent.

A few sales of the Sioux Consolidated company's November dividend have been reported at 6 cents and 5 cents a share, but those who are best informed contend that the regular sum of 7 cents a share will be paid.

Whether Grand Central will resume the paying of dividends this month remains to be determined. The most definite statement to be obtained from Colonel C. E. Loose, the company's general manager, is that Grand Central without doubt will pay a dividend some time before will pay a dividend some time before

No question is raised that Colorado will pay its regular dividend of 8 cents a share, nor that Uncle Sam will "come through" with its 2-cent distribution.

NEW STRENGTH IN

Man Who Brought in Florence Grand Central and Mason Val- Great Dike in Shoshone May ley Higher-Colorado Be Even Richer Than Ladge ando Sioux Firm. First Opened.

> Listless trading continued the feature of the mining stock market, with most which courses at least 3,500 feet through of the issues holding strong, considering the lack of demand. Dividend prospects begin to figure as a strengthening or weakening influence. Colorado and Sioux holding at regular pixes indicates that there is little doubt of their making the regular distributions this month, while slight weakening of Iron Blossom yesterday showed a feeling of uncertainty in regard to its forthcoming action. Grand Central was strong at \$2.20 to \$2.22½, Masson Valley saw new demand which caused it to again cross the \$2 mork, and there was new activity in Nevada Hills at 76 cents to 78 cents. Columbus Consolidated was weak at 68 cents to 65 cents.
>
> Total number of shares sold, 68,837; value, \$19,488.58. Closing quotations and of the issues holding strong, considering the property of the Shoshone Quicksilver

The North Bingham company started several months ago sinking a shaft at the mouth of its tunnel, which had been driven more than 1,000 feet on a great vein more than 100 feet wide at the surface, which is believed by experts to be the northern extension of the Highland Boy vein. In driving the tunnel there was taken out considerable are which ran \$20.

taken out considerable ore which ran \$20 a ton and better in gold. Several shipments of this class of ore were made to

the smelter.

But the ore on the tunnel level shows unmistakable evidences of excessive leaching. The men behind the North Bingham company became convinced that a great

company became convinced that a great mine was to be made in the ground, but that it would be necessary to go to considerable depth to get into the zone of redeposition. In view of this, sinking was started from the tunnel level and the shaft has been equipped with hoist and compressor capable of working to the 1,000-foot level.

Looks Like Big Mine.

Results obtained from work in the shaft have been closely guarded by the management, but it is known that they have been highly encouraging. The formation and the character of the ore encountered are said to be identical with those found in the Highland Boy ground of the Utah Consolidated company, and it is believed that the workings are developing a body of ore which will create excitement when somewhat greater lepth is attained and details of its characteristics become known.

Owners of neighboring properties, who

astic over what information they have been able to obtain, with the result that more development and assessment work is being done in the Barney's canyon region than has been done for a number of years

UTAH COPPER MEN ON WAY Jackling Goes to Colorado to Meet Other Directors.

D. C. Jackling, general manager of the Utah Copper company, left yesterday in his private car for Colorado Springs, where he will meet the other members of the official families of Utah Copper, Ray Consolidated, Chino Copper and Gila Copper, to accompany them upon a general trip of inspection of the properties of all of those companies. From Colorado Springs the party will go through to Ely without stop, returning to this city next Tuesday. After inspecting the mines at Bingham and the mill at Garfield they will proceed to Arizona and New Mexico. New Mexico. New Mexico.

The party will include C. M. MacNeill, Spencer Penrose, Aldrich Sherwood, J. D. Hawkins, Charles Hayden, A. Chester Beatty, S. W. Eccles, Pope Yeatman and several others, probably to be joined in Nevada by John Hays Hammond.

IMLAY ADDS SECOND SHIFT TO MILL FORCE

Abosrbing Cumberland Ely to Mark Start for Larger Output.

Nevada Consolidated, according to advices from the east, is soon to authorize instruction of the fifth unit of its concentrator at the Steptoe Valley smelter, even if that action has not already been taken. The Minneapolis Steel company, it is said, will be awarded the contract for the work.

it is said, will be awarded the contract for the work.

It was announced by S. W. Eccles the last time he visited Ely that no more construction work would be undertaken until some time next summer, but it is believed the absorbing of Cumberland Ely, together, possibly, with considerations arising from the mysterious influence which is causing the advance in price of the big coppers, has led Nevada Consolidated to change its plans to the extent of hurrying construction which will permit increase of production.

Rumors of like character which make it appear that directors of Utah Copper are likely upon the occasion of their visit here next week to order enlargement of that company's mill to 10,000 tons a day capacity, appear in measure to confirm the oft-repeated prediction made by eastern authorities that something out of the ordinary is about to happen in the copper world—something to cause a largely increased demand for the metal is the only inference to be taken.

a tunnel.

PIONEER LEASE WILL INCREASE PRODUCTION

With the drifts cleared, the ore blocked out ready for stoping and three carloads of ore in the loading bins, the management of the Pioneer lease has been forced to call on Rhyolite for more freight teams, says the Rhyolite Heraid. This morning two outfits left for Pioneer to relieve the congestion there, and aid in an increased output output.

Everything in and about the lease is magnificent condition, considerably better than last week. More ore area, greater general average, and increased receipts—and more coming up.

Mining Notes.

Tony Jacobson is at Alta inspecting developments in the Columbus mine. R. L. Edwards is in the city from Sal-mon City, Ida., where he is operating the Kitty Burton mine.
